

HDOC – Day 26

C Programming Assignment

Name – Avinash Singh

Sap id - 590033908

Batch 16

Date - 19/09/2026

Topic: Right-aligned patterns using switch statement and nested loops (without arrays)

Problem: Display a menu, accept the user choice, and print the selected right-aligned pattern. Each pattern is implemented using a separate parameterless function with no return value.

Algorithm

1. Display the menu and read choice.
2. According to the choice, call the corresponding parameterless function.
3. Read n and reject $n \leq 0$.
4. For each missing pattern position, print FOUR spaces.
5. For each actual star, print "*" .
6. For the number pattern, print the natural number followed by three spaces.
7. Print a newline after every row.
8. Stop.

C Program

```
#include <stdio.h> void
```

```
increasingStar(void); void
```

```
increasingNumber(void); void
decreasingStar(void);

int main(void)
{
int choice; printf("RIGHT-ALIGNED PATTERNS MENU\n");
printf("1. Right-aligned increasing triangle\n"); printf("2.
Right-aligned increasing number triangle\n"); printf("3.
Right-aligned decreasing triangle\n"); printf("Enter your
choice: "); scanf("%d", &choice); switch (choice)
{
case 1:
increasingStar();
break; case 2:
increasingNumber();
break; case 3:
decreasingStar();
break; default:
printf("Invalid choice.\n");
}
return 0;
}

void increasingStar(void)
{ int n, i,
j;
```

```

printf("Enter number of rows: "); scanf("%d",
&n);
if (n <= 0) { printf("Invalid input. Enter a positive
integer.\n"); return;
}
for (i = 1; i <= n; i++)
{
for (j = 1; j <= n - i; j++) printf(" "); /*
four leading spaces */ for (j = 1; j <= i;
j++) printf("* "); /* star + three
spaces */ printf("\n");
}
}

void increasingNumber(void)
{ int n, i,
j;
printf("Enter number of rows: "); scanf("%d",
&n);
if (n <= 0) { printf("Invalid input. Enter a positive
integer.\n"); return;
}
for (i = 1; i <= n; i++)
{
for (j = 1; j <= n - i; j++) printf(" "); /* four
leading spaces */ for (j = 1; j <= i; j++)

```

```

printf("%d ", j); /* number + three spaces */
printf("\n");
}
}

void decreasingStar(void)
{ int n, i,
j;
printf("Enter number of rows: "); scanf("%d",
&n);
if (n <= 0) { printf("Invalid input. Enter a positive
integer.\n"); return;
}
for (i = n; i >= 1; i--)
{
for (j = 1; j <= n - i; j++) printf(" "); /*
four leading spaces */ for (j = 1; j <= i;
j++)

printf("* "); /* star + three spaces */
printf("\n");
}
}

```

Test Case Table

TC	Choice	n	Expected output	Result
1	1	4	Right-aligned increasing star triangle with 4 rows	Pass
2	2	4	Rows: 1; 1 2; 1 2 3; 1 2 3 4, right-aligned	Pass

3	3	4	Right-aligned decreasing star triangle: 4,3,2,1 stars	Pass
4	4	-	Invalid choice.	Pass
5	1	0	Invalid number of rows.	Pass
